

# New at VEIT-Group

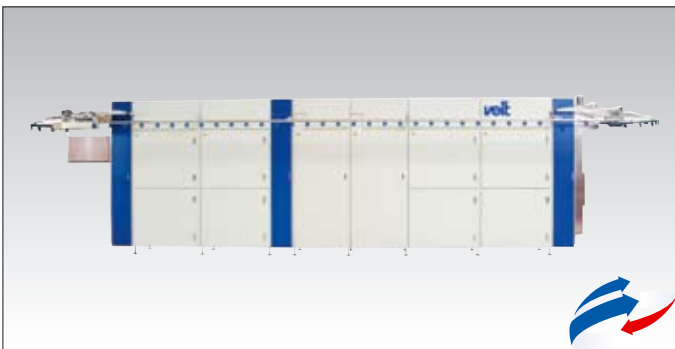

**eMotion**  
*more performance*  
*more quality*  
*less energy*

## Energy efficiency equals reduced costs!

**Most of the energy used in garment production is consumed in the pressing rooms.**

For this reason, the VEIT Group is dedicated to developing energy efficient equipment, allowing our **clients to reduce costs**. The VEIT *eMotion* series offers products specifically designed to meet our commitment to produce energy efficient equipment. As a result, each *eMotion* machine achieves a minimum of 25% energy savings over standard models. We are proud to introduce the first products in our revolutionary VEIT *eMotion* series with a promise of more soon to follow.

## VEIT *eMotion* Series Machines

### VEIT 8657 Tunnel Finisher

The newly designed VEIT Tunnel Finisher sets new industry standards for quality, performance and energy efficiency. Highlights include Teflon resin-coated walls, innovative spray nozzles and new blower technology resulting in **over 40 % energy savings**.

- Improved finish results, especially with natural fibers
- Reduced **steam consumption** (up to **30 % less** than other models)
- Reduced **energy consumption** (**over 40 % less** than other models)
- Process up to 5000 pieces/hour
- Reduced cost per piece

### BRI 222/101 Double Legger

The double legger press BRI 222 offers a linear motion with a vertical upper buck for the best finish result. Equipped with the *eMotion* system, this press realizes **over 40 % energy saving** over standard presses.

- Integrated Energy-Efficiency System (patent pending)
- Vertical closing of upper buck for distortion-free pressing
- Patented heating system

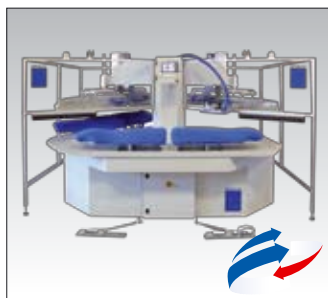

### EXT 1000 CU Fusing Machine

The new fusing machine with a new pressure and heat system provides the best fusing results ever achieved.

- Modular design optimally meets unique client requirements
- Intelligent power management with up to **25 % energy savings**
- Newly developed pressure system provides uniform pressure over the entire fusing width

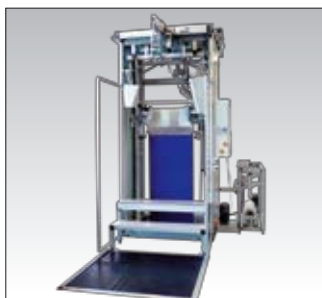

## Pressing Machines and Bagging Machines

- BRI 1220 Final Pressing Machine**  
120° carousel for final pressing of front and back. Equipped with the VEIT *eMotion* system, this press realizes **over 40 % energy saving** over standard presses.
- BRISAY Hexagonal column saves space over portal or arm designs
  - Buck sizes for up to XXL
  - Bucks can be mounted without a gap, accommodating coats
  - Small floor space requirement

- BRI 221E Single Legger**  
New Fastback press offers high productivity and first class results with vertical buck closing.
- Distance pressing avoids marks and shine
  - Fastback principle provides excellent visibility of the garment for the operator
  - Pre-steam treatment possible
  - Rapid, successive opening and closing for sensitive fabrics

- TLS-05 Bagging Machine**  
The new automatic bagging machine is designed for smaller production runs (up to 400 items/hour with top seal). Like all BRISAY bagging machines, this module offers total reliability at an affordable price:
- Top quality components
  - Low maintenance grease-free drive belt
  - Small floor space requirement

- T2LS-50 Bagging Machine**  
The new T2LS-50 is the top performing BRISAY bagging machine, offering the highest reliability, great flexibility and production up to 1200 items/hour.
- Top quality components
  - Low maintenance grease-free drive belt
  - Air volume reduction to avoid balloon effect – optional
  - Upper vacuum and lower vacuum – optional

## Ironing Tables and Steam Generators

- VEIT Varioset S+B CR2**  
The incredibly successful Varioset has been redesigned and optimized.
- Energy efficient – no surface heating necessary
  - Electronically regulated, separately adjustable strong suction and blowing
  - Available with a wide variety of bucks
  - Integrated Veitronic for connection of HP2003 iron

- VEIT Varioline S+B Flat Top Table**  
Based on the successful VEIT Varioset, the VEIT Varioline offers many of the same benefits, but has manually controlled suction and blowing.
- Very affordable
  - Strong manually adjustable suction and blowing
  - Energy efficient – no surface heating necessary
  - Available with a variety of bucks
  - Left and right hand side operation

- VEIT Varioline S DB**  
The VEIT Varioline is also available as a pure suction model, offering many benefits of the VEIT Varioset.
- Ergonomically designed with adjustable operating height
  - Manually adjustable suction
  - Very affordable
  - Available with a wide variety of bucks
  - Left and right hand side operation

- VEIT Steam Generator 2366**  
The new steam generator with a 2,2 kW capacity occupies a small floor space due to its compact design and can be directly attached to all VEIT Varioset/Varioline vacuum tables.
- Ideal for use with Varioset/Varioline
  - Direct water connection or water supply tank capabilities
  - Stainless steel
  - Numerous safety features

# Shirt Presses and Blouse Finisher

#### VEIT 8905 Collar and Cuff Press

Completely newly developed electrically heated collar and cuff press with integrated vacuum in lower buck offered at an affordable price. Also available as steam-heated model.

#### VEIT 7500 Collar and Cuff Press

Newly developed collar and cuff press is suitable for various sized shirts and blouses, as well as short sleeved versions.

- Adjustable bucks for varying cuff sizes
- Cuff presses can be switched off to accommodate short sleeved shirts
- Totally uniform pressure supply
- Adjustable temperature
- Adjustable pressure

#### VEIT 8900 Shirt Press

Shirt press accommodates short and long sleeved shirts. The body is pressed and the sleeves simultaneously finished through an integrated hot air system.

- Newly developed 3-D buck
- Two different sleeve tensioners available
- Touch screen operation in multiple languages

#### HP-V3 Shirt Press

Newly designed shirt press provides the highest productivity with easy Touch screen operation.

- Completely pressed shirt body
- High productivity
- Spring cushioned bust with long life time
- Oil heated bucks

#### VEIT 8430 Blouse Finisher

New semi-automatic blouse finisher offers manual operation (no pneumatic cylinders) to ensure damage free finishing, especially with stretch fabrics.

- Inexpensive machine
- High productivity
- No garment distortion
